52) There is an ongoing discussion about implementing mandatory security requirements for artificial intelligence companies.

Proponents argue these measures are essential to safeguard critical AI technologies from potential theft or compromise by foreign entities, which could threaten national security.

Opponents contend that such regulations would stifle innovation and limit widespread access to AI technologies by creating excessive barriers.

Which perspective do you find more convincing?

	All	18 to 44	45 to 64	65+	Female	Male
